APPENDIX 3

SMALL VALUE LICENCES—ENHANCEMENT OF

It is well known that the system of quota licences freezes the pattern of import trade. The rigid application of this system has, by circumscribing the opportunities for the exercise of commercial skill and enterprise, operated as a stumbling block for attempts on the part of small importers to improve their business. An attempt has been made to provide an opportunity to small licence holders to expand their business to a limited extent in the items mentioned in the first two columns of the table below. The words "small value licences will be enhanced" have been inserted against the items concerned in the remarks column of the Policy Statement in Section II of the Red Book.

2. In the case of items where quota licences upto a certain value limit will be doubled, the Established Importers whose entitlement works out to less than twice the figure quoted in column 3, will be eligible to ask for the value of their licence to be suitably enhanced so as to provide adequately for marginal adjustments.

LIST OF ITEMS WHERE SMALL VALUE LICENCES HAVE BEEN ENHANCED

The balance 8 per ce could only be utilised for import of spare parts of permissil Machine Tools to be authorised by the licensing authority. It expected that importers will stock sufficient spares for Machi Tools to keep the machines supplied by them running. The poli and procedure for the import of Machine Tools by Establish Importers under US-Aid will be announced separately.

5. In addition to the provision for grant of licences for imp of Machine Tools from U.S.A. under US-Aid in para 4 above, qu licences will also be issued to Established Importers for import spare parts of permissbile Machine Tools as specified in Sched 'A' to this appendix from General Area on a quota of 1¼% of h of their best year's imports of complete Machine Tools.

authority before shipment is effected, would also be considered on merits in consulation with Development Officer (Tools).

11. Established Importers can also make applications on behalf of Actual Users for import of Machine Tools required by them. Such applications will be considered on the recommendation of the sponsoring authority concerned. The licences will be granted in the name of the Actual Users with a letter of authority in favour of the importing house.

12. It will be necessary for the applicants to indicate from which particular country they propose to obtain the equipment. As the funds available for such licensing from different countries vary and cannot always be used for imports from other countries, importers should when specifying the stores of supply also indicate alternative sources from which the equipment could be made, if possible, in order of preference. In case, the country of supply is not indicated, there is a delay in the disposal of the application.

N. B.—(*i*) The dimensions shown against all adapter ball bearings as shown in Appendix 14 (2) and (3) are the internal bore of the sleeves fitted to the bearing and not the internal bore of the bearing without the sleeves. As such, all Adapter Ball Bearings as shown in Appendix 14 (2) and (3) can only be imported within the restricted imports irrespective of the fact whether they are imported with or without the sleeves. The face value of restriction for any single type of Adapter Bearings will henceforward deem to apply jointly for both inch sizes and millimeter sizes in case of Adapter Bearings. In other words ceilings under the face value of each size will be a joint ceiling for inch as well as the corresponding millimeter size. This will also apply to non-restricted types of Adapter ball bearings.

(*ii*) In addition to the two makes given in the appendices, viz., Hoffmann and SKF ball bearings of other makes falling within the specific sizes and specific types mentioned in the appendices will also be treated as restricted types and will be licensed within the restricted imports.

(*iii*) Catalogue references quoted in the appendix are purely for purposes of identification and no representation from any manufacturer Indian or Foreign for inclusion of his brand will be entertained.

Some of the drugs and medicines are given in Lists I, II and III. Licences issued for drugs and medicines will not be valid for import of items mentioned in List II, but past import of items shown in List II, if imported within the basic period, will count for computation of consolidated quota for drugs and medicines. List III contains items of drugs and medicines for which licences will be granted separately for each item on a quota based on imports of individual items. The consolidated quota certificates issued to established importers for general and soft areas respectively will not be disturbed though a few items have been given separate quotas based on the import of those items only and included in List III. However, in cases where quotas have been established only on the basis of past imports of a single item under general drugs and medicines, which is subsequently included in List III, the quota certificates so issued will have to be surrendered, if the importers desire to get their quota re-established under List III on the basis of the past import of that item.

2. Licences will be granted on a quota of 5 per cent. of half of the best year's imports of Drugs and Medicines falling under this S. No. excluding items 1 to 42 in List III and S. No. 31 (b)/V. These licences will be valid only for import of items as detailed in List I.

SPECIAL ELECTRIC BULBS WHICH ARE FITTED TO PHOTOGRAPHIC INSTRUMENTS, SCIENTIFIC INSTRUMENTS, OTHER INSTRUMENTS ETC.—IMPORT O

Representations have been received that scientific photograph and other instruments are often rendered idle on account of the fa that they need special types of electric bulbs for use with them ar normally speaking the importers of such equipment do not ho import licences for electric bulbs. The following decisions ha been taken to remove these difficulties :—

(a) In future, whenever a complete equipment is importe in which an electric bulb having some peculiarity as size, shape or filament is used, it will be permissible import three spare bulbs of precisely the same type a make as is fitted to the equipment imported. If the numb of bulbs fitted to the equipment exceeds one, the numb of spare bulbs to be imported will be thrice the number bulbs in the equipment. The value of the spare bul will be debited to the value of the licence against whi the equipment is imported.

(b) In order to enable the supply of replacements to equipme already imported in the country in the past, importe holding licences for equipment of a type for which su special non-G.L.S. type lamps are required will be permitt to apply for the endorsement of their existing licences cover the imports of special types of lamps. This conce sion will only be granted to established importers w have imported equipment needing such bulbs during t last three years and it will be necessary for them to pr duce documents (bill of entry and invoices) to show th they have made such imports during each of the last thr years. On production of such documents, their existi licences for the import of a particular equipment will made valid for the import of spare bulbs also upto a val not exceeding 2½ per cent. of the total c.i.f. value of t licence.

(c) Where the equipment in question has been imported in t past under Open General Licence, established importe will be granted a special licence for the import of no G.L.S. type of bulbs to fit such equipment equal in value 2½ per cent. of the value of such equipment actually i ported by them during any of the three years ending 3 March, 1952, provided they produce documents to sh that they have been making such imports during each the last three years.

MACHINERY (OTHER THAN MACHINE TOOLS) FOR WHICH LICENCES WILL NOT ORDINARILY BE VALID—LIST OF

List 'A'.—This list contains articles of machinery (other than Machine Tools) for which licences granted for machinery to Established Importers and Actual Users will not be valid.

List 'B'.—This list contains articles of machinery (other than Machine Tools) for which quota licences granted to Established Importers for machinery will not be valid; but applications from Actual Users or Importers having orders from Actual Users will be considered provided evidence is produced to the effect that indigenous manufacturers are unable to supply the machinery required.

In preparing List A, care has been taken to include only such items of machinery as can be readily obtained from indigenous sources and are produced in sizeable quantity of approved quality, while in List B, such of the items as can be manufactured against specific orders as per customers' specifications have been included.

COMPONENT PARTS AND SPARES

1. Where an actual user or an established importer having firm orders from an actual user desires to import spare parts of any of the machines listed in this Appendix, the application for an import licence will be considered on merits, provided full justification for the imports of the articles applied for are furnished in the application. If the value of the spare parts required to be imported by an actual user having his place of business at (a) Howrah and Calcutta, (b) Madras, and (c) Bombay exceeds in any half year, Rs. 5,000, the application should be accompanied by a certificate from a qualified Engineer, preferably on the staff of the applicant firm, to the effect that the spare parts required to be imported cannot be fabricated in any of the reputed workshops in (a) Howrah and Calcutta, (b) Madras, and (c) Bombay respectively. This certificate will, however, not be necessary in cases where the value of the applications for spares is less than Rs. 5,000.

2. This concession is also applicable to firms which are situated outside Bombay, Calcutta and Madras. In these cases, if the value of spare parts required is more than Rs. 5,000, the firm should produce a certificate from the Director of Industries of the State concerned to the effect that the spare parts required to be imported cannot be fabricated at the nearest centre of engineering industry.

3. Spare parts and component parts for items banned under the heading 'Cinematograph equipments' List 'A' and under the heading 'Cinema Machinery' in List 'B' of Appendix 35 could be imported

(Section II—S. No. 79/V)

X-RAY ELECTROMEDICAL EQUIPMENT, ACCESSORIES AND SPARE PARTS OF ELECTROMEDICAL APPARATUS, ETC.,—POLICY REGARDING IMPORT OF.

It has been represented to the Government of India that although electromedical apparatus is allowed to be imported, the established importers of these apparatuses cannot get spare parts, accessories and supplies of allied nature for servicing and maintaining the existing equipment properly as these accessories, spare parts and articles of allied nature were classified under different Serial Nos. of the Import Trade Control Schedule which are sometimes licensable strictly on a quota basis or are not licensed at all.

2. With a view to maintain the operation of the X-Ray and electromedical equipment it has been decided that the established importers of X-Ray and electromedical equipment can apply for their requirements of various articles although they may be falling under different Serial Nos. of the Import Trade Control Schedule under one application. A list of articles desired to be imported in broad categories like rotary converters, transformers, photographic tanks, transformer oil and film hangers, etc., and spare parts of the equipment should all be listed and a consolidated application should be made for all these. The requirements should be certified by the All India X-Ray and Electromedical Traders' Association, Bombay.

3. On receipt of the consolidated application giving a list of the articles desired to be imported and the value of each duly certified by the Association, the Import Trade Controller at the port will grant each firm a licence for its consolidated requirements and attach the list of the articles with the licence. Where certain articles are licensed on a quota basis the reasonableness of the demand of those articles can be judged from the firm's quota in respect of that article. The quota for these articles will be merged in the licence allowed. If the firms concerned have obtained any quota licence they should mention the name of the article and the amount of quota licence allowed so that adjustments for the same can be made, if necessary.

4. Although the value of individual articles as per requirements certified by the Association will be indicated in the list of articles for which the licence is granted, the licence holders can exceed the value of individual items by 25 per cent. of the value for that item provided that the total c.i.f. value of the licence is not exceeded.

5. It has also been decided that the import of one pair each of lead rubber X-Ray apron, lead rubber gloves (required for the radiologist) and lead glass "goggles" may be allowed clearance under licence for S. No. 79/V when they are imported along with the X-Ray equipment but not separated from it.

SPARE PARTS TO INDUSTRIAL UNDERTAKING ETC.—ISSUE OF LICENCES FOR COPY OF LATE MINISTRY OF COMMERCE AND CONSUMER INDUSTRIES PUBLIC NOTICE NO. 13-ITC(PN)/57, DATED THE 21ST FEBRUARY, 1957 AS AMENDED.

SUBJECT.—*Issue of licences for spare parts to Industrial Undertakings borne on the books of the Directorate General of Technical Development.*

The question of revising the licensing procedure to enable Industrial Undertakings borne on the books of the Directorate General of Technical Development to import readily essential spare parts of machinery required by them has been considered and it has been decided that:—

(a) Applications from industries borne on the books of the Directorate General of Technical Development for import of 'Emergency' spare parts, *i.e.*, spare parts required on an immediate basis to overcome an emergency breakdown/including a breakdown which is unavoidable for technical reasons in the course of next one month, provided a certificate to this effect is produced from a qualified engineer) of any production machinery, will be considered by the licensing authorities at the ports, and Actual User licences upto a maximum of Rs. 2,500 issued on an immediate basis. The justification for import of the spares in question should be adequately explained in the forwarding letter. Such applications should be boldly stamped on top in red ink as "Applications for emergency spares". The envelope should also be similarly stamped.

(b) Actual User applications will also be considered from such industries by the C.C.I. for import of their normal requirements of replacement spares. These applications should be made only once in a licensing period to the Headquarters Office and should be stamped as "Applications for replacement spares" in the manner indicated under (a) above. The applicants should clearly indicate the value of licence, if any, for emergency spares obtained from the port licensing authority.

2. Applications from industries not borne on the books of the Directorate General of Technical Development will continue to be dealt with, as hitherto, in accordance with the normal procedure.

NOTES:—

(1) The provision contained in para. 1(a) of the above Public Notice has also been extended to Industrial Undertakings not borne on the list of the Directorate General of Technical Development. Applications for emergency spare parts for Machine Tools falling under Part VI of the I.T.C. Schedule, will also be entertained by the port licensing authorities under these provisions.

(2) No last date for receipt of applications for emergency spares has been prescribed and such applications will therefore be considered on merits throughout the licensing period.
